GitHub: https://github.com/Tejpraval Mobile: +91-9676767993

## Skills

- **Languages**: C++, TypeScript, JavaScript, Python, C
- **Frontend:** React.js, HTML5, CSS3, Bootstrap
- **Backend:** Node.js, Express.js, REST APIs, JWT Auth, Middleware Architecture
- **Database:** MongoDB, MySQL
- **Tools:** Postman, Git, MongoDB Compass, Figma
- **Core Concepts:** RBAC, API Security, Data Validation, Error Handling, Policy Versioning, Approval Workflows, DSA
- **Soft Skills**: Problem-Solving, Team Leader, Communication

## Internship

**Alpha Innovation** | *AI Intern* | Certificate Aug 25 – Oct 25

- Developed and evaluated a supervised classification model, performing data preprocessing, feature engineering, and accuracy analysis to support AI-driven prototypes.
- Collaborated on innovation workflows, exploring problem-framing, idea generation, and solution testing within real project environments.
- Supported end-to-end AI experimentation—data exploration, model evaluation, and insight synthesis—to help shape actionable product directions.
- **Tech Stacks used**: Artificial Intelligence, Machine Learning Concepts, Python, Jupyter Notebook, Data Processing Fundamentals, AI Workflows

**Codtech IT Solution** | *Frontend Development Internship* | Certificate Mar 25 – Apr 25

- Delivered 4 production-style frontend applications with responsive layouts and dynamic state handling.
- Implemented responsive layouts and interactive components, ensuring smooth performance across devices and screen sizes.
- Applied real-world development practices—version control, structured workflows, and iterative refinement—to deliver production-ready frontend features.
- **Tech Stack used**: HTML, CSS, Bootstrap, Flexbox, React.js

## Projects

**Multi-Tenant Policy Governance Control Plane** | GitHub | Jan 25 –Present

- Architected a **multi-tenant policy governance control plane** enabling safe evolution of access-control rules through **pre-execution simulation, quantified risk scoring**, and approval-gated activation.
- Engineered **a versioned policy lifecycle** system with immutable simulations, idempotent execution logic, and tenant-scoped RBAC enforcement to prevent privilege escalation and cross-tenant exposure.
- Implemented progressive rollout mechanisms including canary deployment stages, cron-driven impact evaluation, and **autonomous rollback** for high-risk policy changes.
- Built a governance cockpit providing real-time visibility into policy simulations, approval aging, rollout progression, and risk alerts to support controlled policy evolution.
- **Tech Stack used:** MERN + TypeScript

**Sentiment Analysis of Social Media Comments** | GitHub Nov 25 – Dec 25

- Preprocessed social media comments and generated **512-dimensional semantic embeddings** using Universal Sentence Encoder (USE).
- Trained and compared ExtraTrees, CatBoost, and Logistic Regression models for multi-class sentiment classification (negative, neutral, positive).
- Achieved **88.88% accuracy**, outperforming TF-IDF + Naïve Bayes baseline by ~10–20%.
- Evaluated model performance using confusion matrix, precision/recall, F1-score, and ROC-AUC metrics.
- **Tech Stack used:** Python, scikit-learn, TensorFlow Hub (USE).

**Todos Application** | GitHub | Link Mar 25 – Apr 25

- Developed a streamlined task-management solution using HTML, CSS, and Bootstrap to deliver an intuitive user interface.
- Engineered seamless CRUD functionality with JavaScript event listeners and dynamic UI updates, enabling users to add, save, check off, and delete tasks effortlessly.
- Implemented secure task persistence through local storage, ensuring tasks remained accessible across sessions.
- **Tech Stack used:** HTML, CSS, Bootstrap, Flexbox

## TRAINING

**Think Design Prototype - Summer Training on Design Thinking & Figma:** | Certificate Jun 25 –Jul 25

- Completed a comprehensive hands-on Summer Training Program in Design Thinking and Figma, applying end-to-end UX processes from user research and problem definition to **wireframing and high-fidelity interactive prototyping**.
- Designed and developed an **offline-first digital learning prototype** (GyaanSetu) addressing connectivity challenges faced by rural students in India.
- Implemented an interactive Figma prototype simulating core features such as offline lesson access, quiz attempts without internet, and a **Smart Sync Bubble** for automatic data synchronization.
- Conducted user research and usability testing with students and teachers to validate the solution, refine navigation, and improve accessibility through local-language support and simplified UI.
- **Tech Stack used:** Canva, Figma.

## CERTIFICATES

- Explored the fundamentals of Model Context Protocol| Nxtwave Aug 25
- Built a pitch-ready product successfully using 10+ AI tools| *Nxtwave* Sep 24
- Completed the project on Malicious Email Investigation | *Nxtwave* Oct 23

## ACHIEVEMENTS

- **Campus Ambassador** – Alpha Innovation: Aug 25
  Recognized as a Campus Ambassador for initiative and impactful contributions.
- **21-Days NxtCode Challenge** – Nxtwave: May 24
  Assisting in participant coordination and promoting social awareness activities
  .

## EDUCATION

- **Lovely Professional University** Punjab, India
  *Bachelor of Technology - Computer Science and Engineering (AI & ML);* ***CGPA: 7.5*** Aug 23 – Present
- **Career point Junior College** Rajahmundry, Andhra Pradesh
  *Intermediate;* ***Percentage: 77%*** Jun 20 – Mar 22
- **St Ann's School** Rajahmundry, Andhra Pradesh
  *Matriculation;* ***Percentage: 75%*** Jun 19 – Mar 20
